

Sinclair Broadcasting does not own the airwaves over which it plans to air its propaganda piece. Those airwaves are owned by the public. I cannot recall an instance where a broadcasting company ordered its stations to pre-empt network programming to air a political hit piece and provided that air time FREE OF CHARGE. This is outrageous and should go beyond the cries of foul that might come from either end of the political spectrum. Any thinking person not blinded by partisanship should be able to see the very dangerous precedent being set should Sinclair's actions be allowed to stand.
